completó con éxito el programa especializado en línea sin créditos

Data Science Fundamentals with Python and SQL

The earner of this certificate has demonstrated mastery of foundational skills required for Data Science, including a working knowledge of open source tools and libraries such as Jupyter notebooks and R Studio, Python programming language, Statistical Analysis techniques, SQL and relational databases. The individual has hands-on practice and completed several projects involving real-world data sets employing tools and techniques used by practicing data scientists. The learner is now armed with the skills and knowledge to start tackling Data Science problems and challenges.

Rav Ahuja, Program Director, IBM Skills Network
